## 02. Setup Drupal 8 Backend

composer require "drupal/entity\_print 2.x"

## 02. Setup Drupal 8 Backend

### Configure entity print

The screenshot shows the Drupal 8 administration interface for the Entity Print module. The breadcrumb trail is: Home » Administration » Configuration » Content authoring. The page title is "Entity Print" with a star icon and the URL "/admin/config/content/entityprint".

**ENTITY PRINT CONFIG**

- ☒ **Enable Default CSS**  
Provides some very basic font and padding styles.
- ☐ **Force Download**  
This option will attempt to force the browser to download the Print with a filename from the node title.
- PDF**  
Dompdf  
Select the default PDF engine for printing.

<https://www.drupal.org/docs/8/modules/entity-print/pdf-engine-support>

**DOMPDF SETTINGS**

**Paper Size**  
Letter  
The page size to print the PDF to.

**Paper Orientation**  
Portrait  
The paper orientation one of Landscape or Portrait

- ☒ **Enable HTML5 Parser**  
Note, this library doesn't work without this option enabled.
- ☐ **Disable Log**  
Check to disable DomPdf logging to log.html in Drupal's temporary directory.
- ☒ **Enable Remote URLs**  
This settings must be enabled for CSS and Images to work unless you manipulate the source manually.
