

# Adding modules and managing dependencies.

```
composer require drupal/<modulename>
```

```
composer install
```

```
drush en <modulename> -y
```

```
drupal module:install <modulename>
```

<https://www.drupal.org/docs/develop/using-composer/using-composer-to-manage-drupal-site-dependencies#adding-modules>

Scaffolding new modules quickly

```
lando drupal generate:module
```

```
lando drupal generate:controller
```
