

02. Setup Drupal 8 Backend

Configure Display for content type

The screenshot shows the 'Manage display' interface in the Drupal 8 admin backend. The breadcrumb trail is: Home > Administration > Structure > Content types > Structured PDF. The interface has tabs for 'Edit', 'Manage fields', 'Manage form display', and 'Manage display' (which is active). Below these are tabs for 'Default' and 'Teaser' (the 'Default' tab is active). A descriptive text explains that content items can be displayed using different view modes (Teaser, Full content, Print, RSS, etc.) and that the 'Teaser' is a short format typically used in lists. It states that here, you can define which fields are shown and hidden in each view mode and how they are displayed. A 'Show row weights' link is on the right. A table lists the fields and their display settings:

FIELD	LABEL	FORMAT
Page title	- Hidden -	Plain text
page_description	- Hidden -	Plain text
Resource Card	- Hidden -	Rendered entity (Rendered as Default)
View PDF	View PDF	
Disabled		
View EPub	View EPub	
View Word Document	View Word Document	

02. Setup Drupal 8 Backend

During this stage :

1. Setup fields.
2. Install Entity Print Contrib module.
3. Configure Entity Print.
4. Display View PDF link on Node.
5. Setup Workflow for the PDF content type. (Optional)
